

10th ECNP International Conference on Nanostructured Polymers and Nanocomposites San Sebastian, Spain 3-5 October 2018

We are pleased to invite you to present the last results of your laboratory in the 10th ECNP International Conference on Nanostructured Polymers and Nanocomposites. This conference continues the well-established tradition of international conferences started with the European Network of Excellence NANOFUN-POLY in 2004 in Dresden and continuing every other year through the European Center for Nanostructured Polymers (ECNP) in Lyon, Corfu, Paris, Madrid, Prague, Rome. The conference covers polymer science from fundamentals to applications: synthesis of polymers and macromolecular architectures, characterization, processing, and theory of polymers and nanocomposites.

Topics

- Progress in polymer synthesis
- Structure of nanostructured polymers and nanocomposites
- Advanced processing and characterization techniques
- Modelling of processes and properties
- Application of functional polymers in energy, optoelectronics, sensing, biomedicine and others.
- Sustainable polymer chemistry (polymer materials from renewable resources, polymer recycling, biodegradable polymers)
